OWNER AGREES

☐ To provide electrical outlet for pump.
☐ To clear materials 4' from inside perimeter.
☐ To pay for extra carpentry work.
☐ To pay for extra plumbing work.

The Job Design is based on our experience as professionals and **owners' experience** in the home. Precipitation and water table levels differ each year. We are not responsible for water originating in areas **not serviced**.

Company agrees to install system along _____ of north wall, _____ of east wall, _____ of south wall, _____ of west wall. System does not cover backing up or plugging of sewers, floods, condensation caused by high humidity; damp spot discoloration of walls or floor, water over the top of the foundation, through windows, from wall areas not protected by this installation, sump pumps, (which are covered by separate manufacturer's warranty) pumping capacity of sump pump, pump discharge or consequential damages. Ground water containing rust algae will require the owner of the structure to perform a routine maintenance program.
